Meeting of the ABC Travelling Fellows, Royal North Shore Hospital Sydney, AUSTRALIA

In March of 2012, I founded Sydney Shoulder Research Institute (“SSRI”) with fellow Orthopaedic Surgeon, Dr Benjamin Cass.

SSRI is dedicated to undertaking research that will translate into real patient outcomes and innovations in the field of orthopaedic surgery. SSRI focuses on only a select number of projects at any given time to maximise the quality of our research.

Each year, SSRI appoints two Fellows to undertake independent and collaborative research projects while developing their surgical, clinical and teaching skills under the expert guidance of Dr Cass and myself as well as our esteemed colleagues Dr Jeffery Hughes and Prof David Sonnabend.

Visit www.ssri.net.au for more information.
